Mehula ADMediaTek

Mehula
ADMediaTek

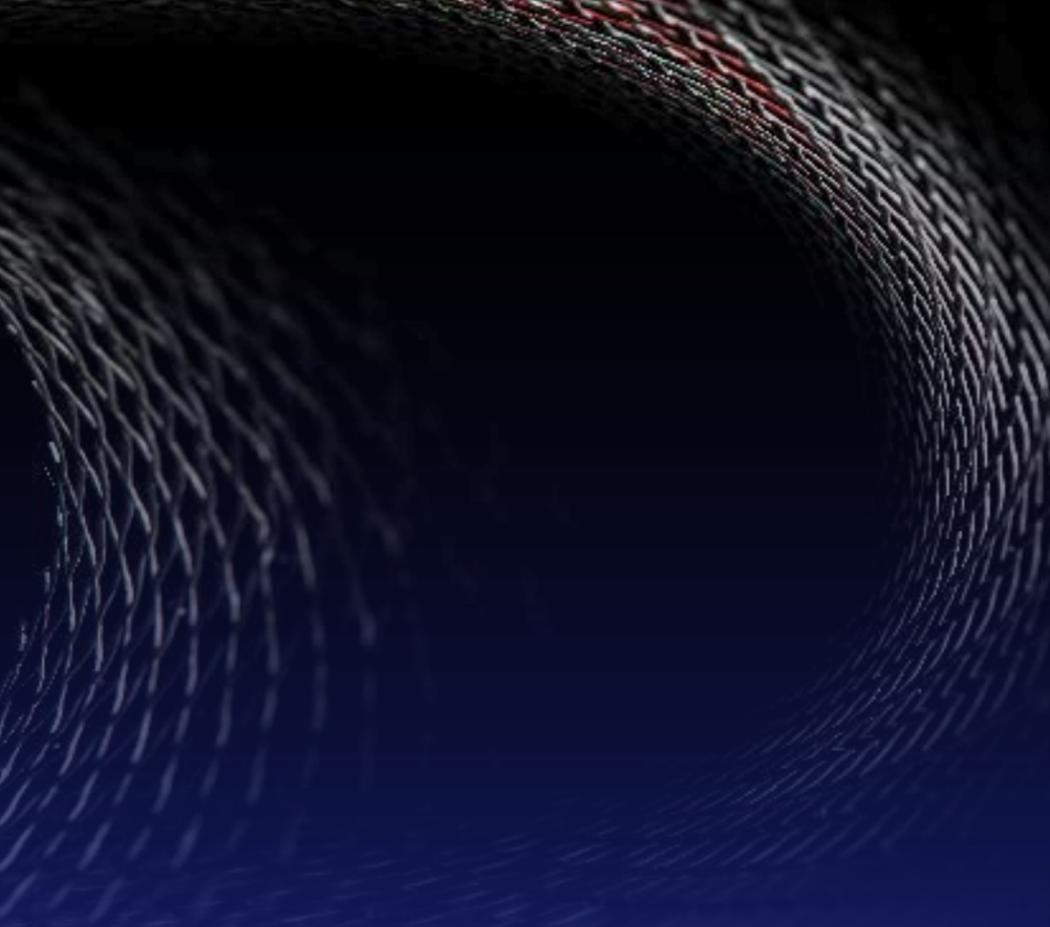

A complex, futuristic network diagram with a central hub and many radiating lines, overlaid with a grid of numbers and dots. The diagram features a central point from which numerous lines radiate outwards, creating a dense, circular pattern. The lines are primarily blue and white, with some red and orange accents. The background is dark, and the overall aesthetic is high-tech and digital. The numbers are scattered across the diagram, some in red and some in white, adding to the complexity and data-driven appearance of the visualization.

About Us

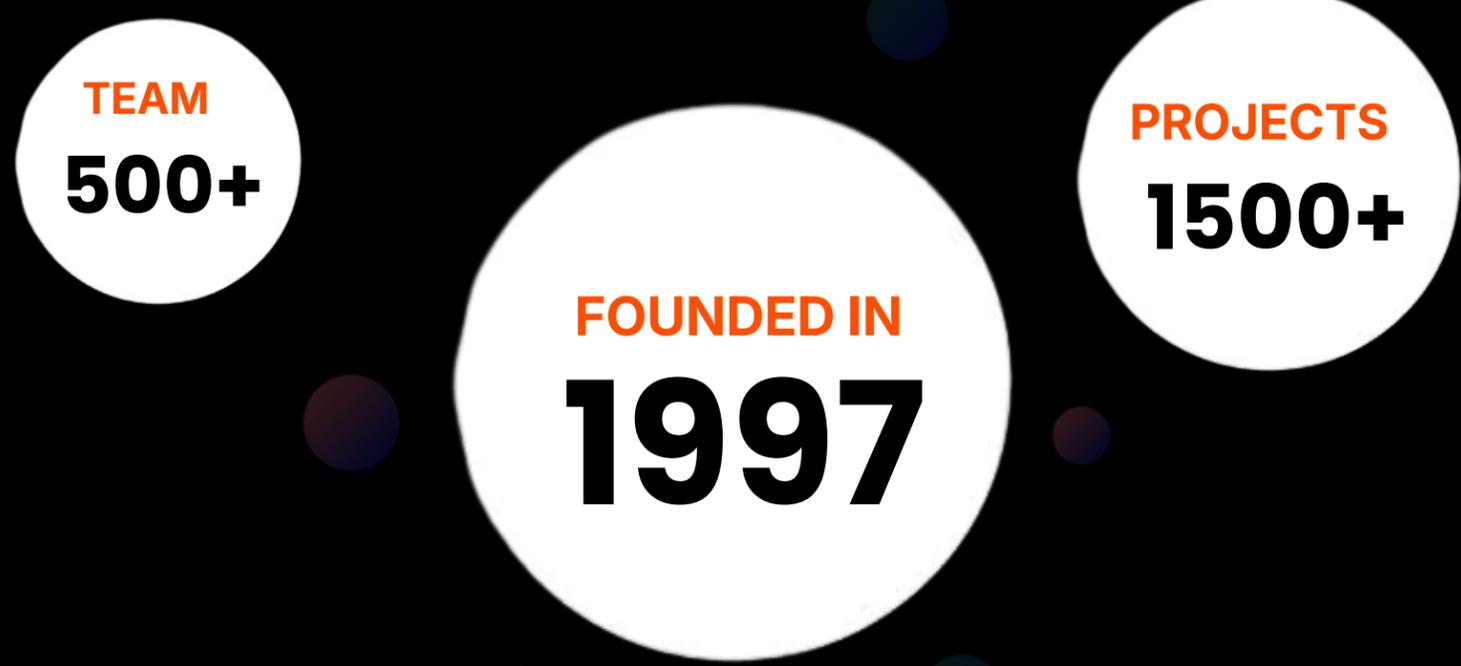

COMMITTED TO
THE FUTURE

We are a web and mobile app development company, working towards bringing a revolution in the digital space by empowering businesses with intelligent solutions and services.

We take the liberty of calling ourselves niche technology service providers with the aim of delivering quality solutions on time.

We are a team of radical thinkers who are at the forefront of the innovation to develop digital solutions backed by powerful technologies.

We combine bold strategies and transformative technologies to deliver our expertise in technology services and digital transformation.

PLATFORM
Web App

TECHNOLOGY:

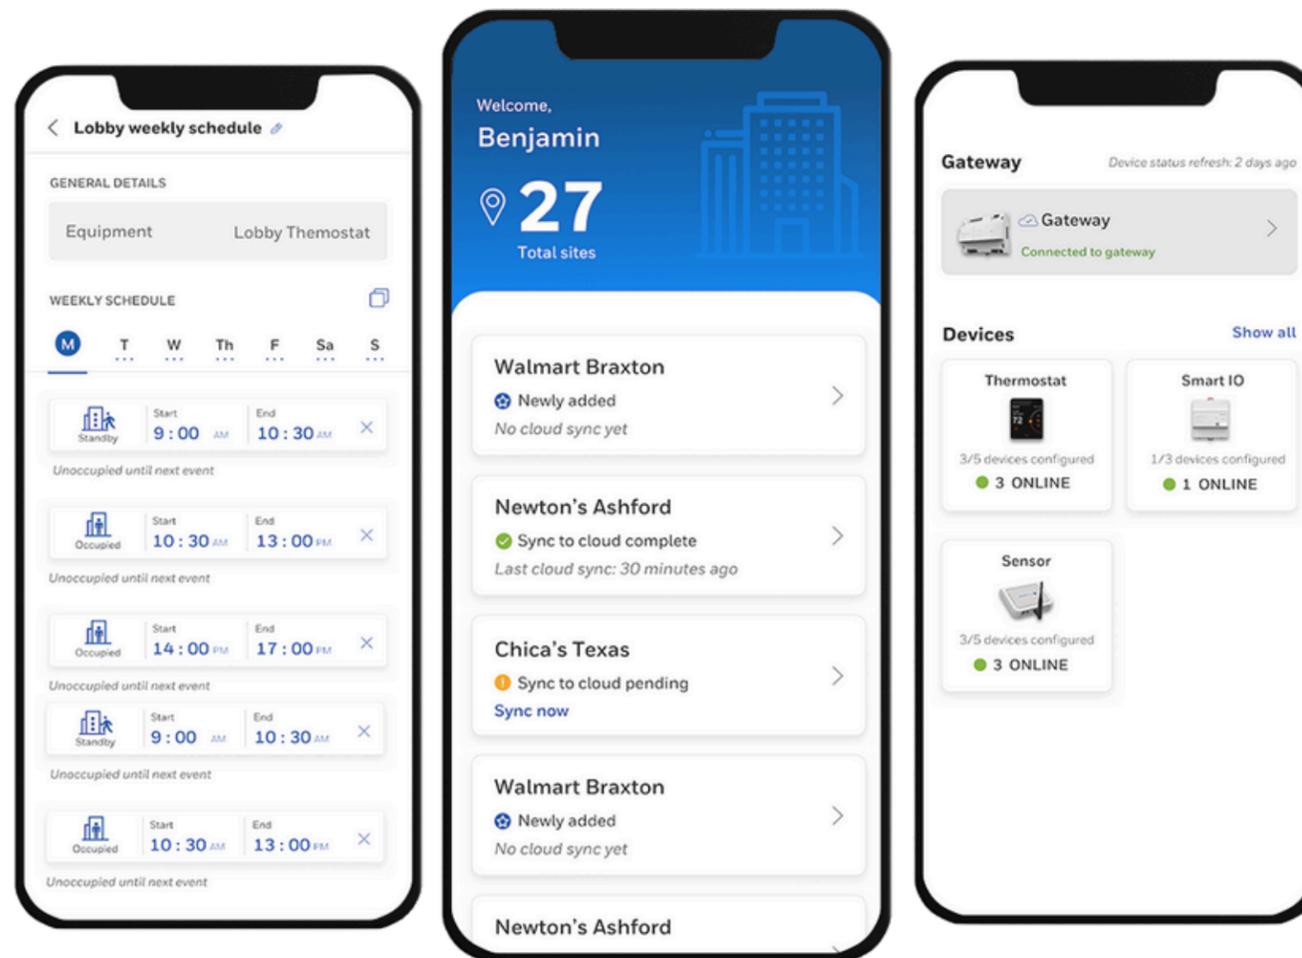

Dimendscaasi Chicago

We designed a premium e-commerce platform for Dimendscaasi Chicago that maintains a real-time diamond inventory sourced from multiple verified vendors. The solution allows shoppers to personalize their rings by choosing design styles, metal options, and diamond specifications, with a live preview available before checkout. Customers can also schedule in-store consultation appointments directly through the platform. Additionally, users can upload an image of their hand to visualize how the selected ring will appear when worn. These advanced features significantly enhanced user interaction and overall customer engagement.

Honeywell

Mehula ADMediaTek built an advanced IoT-enabled application for Honeywell designed to support smart automation across residential and commercial environments. The solution allows users to register accounts, set up and manage connected devices, link them through a central gateway router, and create automated alerts between systems for seamless control. The gateway intelligently sends real-time notifications when sensors identify potential risks or important activities, delivering a dependable safety and monitoring experience. This robust yet intuitive application empowers customers with secure, intelligent automation solutions tailored for modern homes and businesses.

Alo Yoga

Mehula ADMediaTek created a premium digital brand store for Alo Yoga, delivering a clean, intuitive experience that makes browsing and discovering products effortless. Shoppers can easily explore product categories, view detailed information, and receive early access to new collections before they launch in physical outlets. The platform enables customers to place orders, redeem promotional offers, and enjoy home delivery through a secure and reliable payment system. Both the website and mobile application were developed with high-end features to provide a smooth, consistent, and engaging shopping journey.

Zemaas

We have built multiple applications and a website for ZeMaas to support a range of services including mobility, food delivery, and logistics. The ride-booking system enables customers to schedule taxi trips, while drivers can sign up and accept ride requests. Users can save preferred locations, add gratuities, and report concerns when required. In addition, the platform provides a smooth food delivery experience for restaurant partners and customers, allowing them to register, manage online food orders, and monitor drivers in real time. We also created a robust admin dashboard with detailed user and driver data, operator controls, financial management, and additional features across all services.

Dubai Calendar

We built the Dubai Calendar mobile application for government use to highlight festivals, events, and exhibitions taking place across the city. The app also shows live visitor counts for Dubai using data retrieved through an API integrated with the Dubai Tourism Department. In addition, the platform is frequently updated to reflect the latest event changes and schedules. This solution supports the tourism ecosystem by expanding audience reach and contributing to increased revenue opportunities.

Aswaaq Online

Aswaaq Online is a digital hypermarket platform that enables customers to purchase groceries online and receive home delivery. Users can register and connect their Wafa ID to create an account synchronized with physical store systems, allowing them to add products to the cart and complete orders smoothly. The solution supports both online and in-store shopping, with the option for customers to schedule store pickup at a preferred time. In addition, the platform provides administrators with the ability to manage multiple promotional campaigns at once and synchronize order and customer information with the Microsoft D365 ERP system.

TECHNOLOGY:

Indian Railways

The Indian Railways mobile application has surpassed one million downloads and maintains a 4.4 user rating, offering passengers quick access to train schedules, live location updates, and real-time tracking through a simple interface. The app also enables users to check ticket status using their PNR number and search for available trains between selected source and destination stations, helping make travel planning smooth and hassle-free.

Peugeot

We are proud to showcase our expertise through the development of a website for the renowned French automobile brand, Peugeot. In close collaboration with the brand team, we designed features that present the full vehicle lineup, including detailed specifications, color options, and immersive 360-degree views. The platform displays available models for specific countries or regions, allowing visitors to browse and explore vehicles based on their preferences. This approach provides users with a comprehensive understanding of each model before making a purchase decision. Our skilled designers and developers worked meticulously to preserve brand authenticity and translate the vision into a refined digital experience.

Voscreen

VoScreen is a highly rated English learning application with more than one million downloads and an average rating of 4.4. The app delivers interactive lessons, exercises, games, and reading materials that engage learners effectively. It offers clear explanations of vocabulary and grammar, along with quizzes and assessments to evaluate understanding and monitor progress. Users can ask questions, share learning resources, and receive guidance from peers and instructors. The platform is designed to provide a comprehensive learning experience while enhancing confidence in mastering English.

MrpMoney

Mr. Price Money, an authorized financial services and credit provider, offers users a digital wallet with multiple payment options, helping them manage expenses while staying up to date with trends. The platform features 6- and 12-month store card plans and a lay-by service, allowing customers to purchase their preferred fashion, home, and sports items conveniently. In addition, the website includes a recharge function that supports a range of mobile plans, including both prepaid and postpaid options.

Klipsch Connect

The Klipsch Connect App was created to help users get the most out of their Klipsch headphones and speakers by offering customizable equalizers and sound settings. The app allows owners to adjust volume and fine-tune audio effects, including bass, mid, and treble, to personalize their listening experience. It also features sound enhancement options such as virtual surround sound for improved audio quality. Additionally, the app supports Bluetooth connectivity, enabling seamless wireless connection between devices and Klipsch products.

Hubilo

This platform provides a complete solution for event organizers to plan and manage their events while engaging attendees effectively. It includes tools for viewing event calendars and creating detailed event listings with information such as date, time, location, ticket pricing, and registration options. Organizers can also handle ticketing, seating arrangements, and attendee management, making it a comprehensive hub for event planning. The platform is designed to be a reliable resource that helps organizers ensure their events run smoothly and successfully.

Celebfie

Celebfie is a modern, innovative mobile application that transforms how fans interact with their favorite celebrities. The app allows celebrities to register, upload profile images and videos, which users can explore. Fans can connect with celebrities for events and also purchase official merchandise through the app's store. This platform has gained significant popularity among both celebrities and their followers, creating an engaging space for direct interaction and meaningful engagement.

Skyloov

Skyloov is a modern platform featuring a robust search system for users to discover properties efficiently. It provides comprehensive details for each listing, including images, essential features, and 360-degree panoramic community views. Users can search for agents, agencies, and properties in their preferred locations, and reach out to potential buyers or agents via contact forms, phone, or email. Skyloov simplifies connecting with real estate professionals and buyers, making property inquiries and discussions effortless.

Tawuniya

Tawuniya is a mobile application that enables users to buy or renew vehicle and health insurance policies. With just a few taps, users can compare plans, tailor their coverage, and add supplementary insurance products. The app also features a secure payment system, provides detailed policy information, and includes a notification center to keep users informed of any updates.

Additionally, the platform offers a wide array of tools and functionalities, making it a comprehensive solution for individuals seeking complete insurance coverage.

Regalos Publicitarios

The Regalos Publicitarios website offers a simple and convenient platform for users to browse and personalize merchandise across various categories. Customers can place bulk orders in different ranges (1-100, 101-500, 501-1000, and more), with pricing adjusted accordingly. Users can also request samples, get budget estimates, and upload artwork for customization. Additionally, the platform allows customers to track the status of their orders and receive their personalized merchandise directly at their doorstep. Regalos Publicitarios provides an efficient and professional solution for all custom product requirements.

Subbie Me

Subbie Me is a comprehensive marketplace designed to help contractors and subcontractors connect and discover new opportunities. Through the platform, skilled workers such as electricians, plumbers, gardeners, and painters can create profiles showcasing their expertise and past projects, increasing their chances of receiving job offers and inquiries. Likewise, clients can register, post job requests, browse available Subbies, and assign tasks to the most suitable candidates. The platform streamlines workflows, enabling the trade industry to operate faster and more efficiently.

LaundroKart

LaundroKart offers a range of features designed to simplify and optimize laundry management. Administrators can oversee pricing, pickup schedules, holidays, service zones, orders, and staff assignments. Customers can arrange pickups via the website or mobile app, selecting the date, time, and type of wash required. The platform sends notifications for order updates, and payments can be made online or in cash. Delivery personnel can access directions and update order statuses through the app, while managers can approve and assign tasks as needed. LaundroKart currently serves over 100,000 users and has been downloaded more than 50,000 times.

News

PL ATFORM

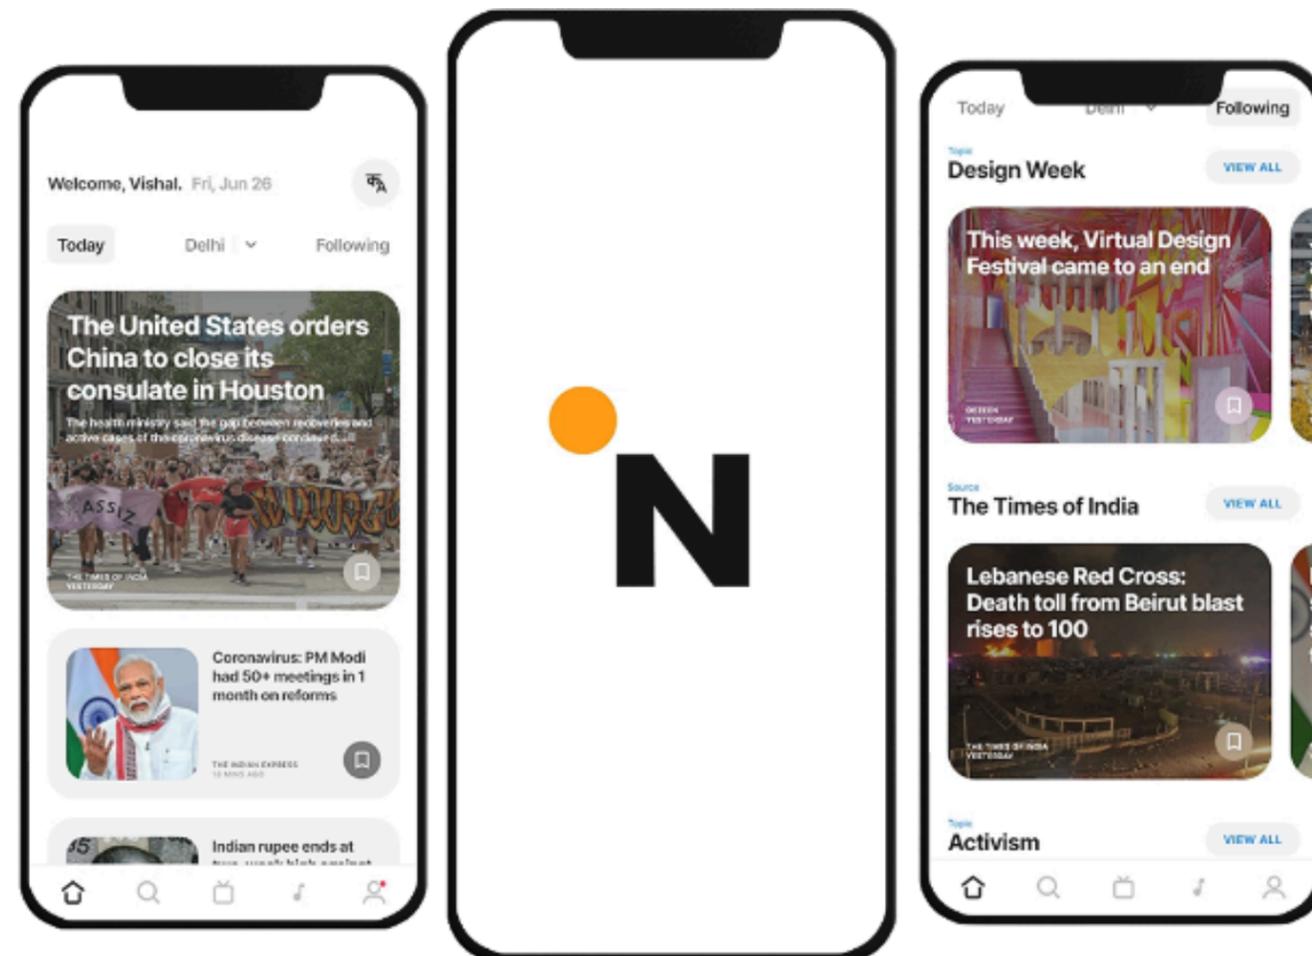

Mobile App

TECHNOLOGY:

NewsPod

NewsPod is a news aggregation app designed to deliver a superior news experience to users. It allows users to personalize their news feed by language, topics, and location, providing access to content from both national and regional sources. The app also enables users to listen to news in their regional language with an auto-play option. Users can bookmark stories of interest and organize them into folders within the app. Additionally, the platform allows adjustments to font size and offers both dark and light theme options. With these advanced functionalities, the app has already gained significant popularity, with over 100,000 downloads.

Eat Well Nashville

Eat Well Nashville is a platform that offers users an easy way to order healthy meals online. The website includes several standout features that enhance the user experience. It allows customers to view detailed descriptions and nutritional information for each food item, helping them make informed choices. Additionally, users can browse a variety of categories such as Bulk Protein, Keto, and Gluten-Free to select their preferred meals. The platform also provides access to discount coupons and promo codes during checkout, making it simple for users to save on their orders.

Padiatric Therapeutics

Padiatric Therapeutics is a mobile application designed for healthcare professionals. It delivers detailed information about the indications for specific drugs and the correct dosages based on age. The app also covers common pediatric conditions such as arrhythmias, dehydration, neonatology issues, burns, and acid-base disorders, along with their current treatment options. By registering on the app, users can quickly search for diseases and access critical information including symptoms, medications, and age-appropriate dosages. The app is created to support medical professionals in providing optimal patient care and streamlining the treatment process.

ProHoff

ProHoff is a comprehensive real estate platform offering both a website and mobile app, enabling users to rent properties effortlessly. The platform provides a smooth process where property owners can create accounts, add property details, set availability, and manage listings through a secure dashboard. Meanwhile, users can efficiently find spaces that meet their requirements. The platform also includes a chat feature to communicate with property owners and allows users to book spaces even on an hourly basis.

Motive Fleet

Motive Fleet is a comprehensive platform for monitoring vehicles, assets, and driver locations using real-time GPS tracking. The web and mobile solution allows fleet managers to track their entire fleet efficiently, view live locations, and monitor driver behavior. Users can set alerts for maintenance, speed, or route deviations, ensuring safety and operational efficiency. The platform also provides detailed analytics and reporting to optimize fleet performance, reduce costs, and improve overall management.

Planta

Planta: Plant & Garden Care is a comprehensive mobile application designed for plant enthusiasts and gardeners. The app provides users with detailed care instructions for a wide variety of plants, including watering schedules, sunlight requirements, and fertilization tips. Users can track their garden's growth, set reminders for plant care, and identify plants using an intuitive recognition feature. Additionally, the app offers expert advice, gardening tips, and a community forum for sharing knowledge. Planta makes plant care simple, organized, and enjoyable for users of all experience levels.
